

A BAD WATCH CAN KILL A GOOD DAY.

The Chevy Volt, with its bold styling and revolutionary E-Flex propulsion system, was an immediate star when it was unveiled at the 2007 North American International Auto Show. Capitalizing on many technologies and innovations developed in the earlier EV1 electric car, it represented the most radical departure from the internal combustion engine in more than a century. Uses common 110-volt outlet.

WHAT'S THE DIFFERENCE?

Nasty names. Shocking even in print. But all too common if you're unlucky enough to be a refugee.

Wait. Why are "you" and "me" among them? And why is every figure identical? They're all the same!

Exactly!

You see, refugees *are* just like you and me. So what's the difference?

There's really only one: fear.

While our homes are safe and our rights are protected, their homes have been left behind and the rights they once enjoyed were swept away

by violence and hatred. They've been living in constant fear for their lives.

That's why they've had to leave their country.

That's why they are refugees. Of course they wish they were back home – wouldn't you?

But it's still too dangerous, and for now we must continue to offer them our help.

So please, don't get mad at refugees.

Instead, save your breath for the situation that's *made* them refugees.
